[Month] 2026

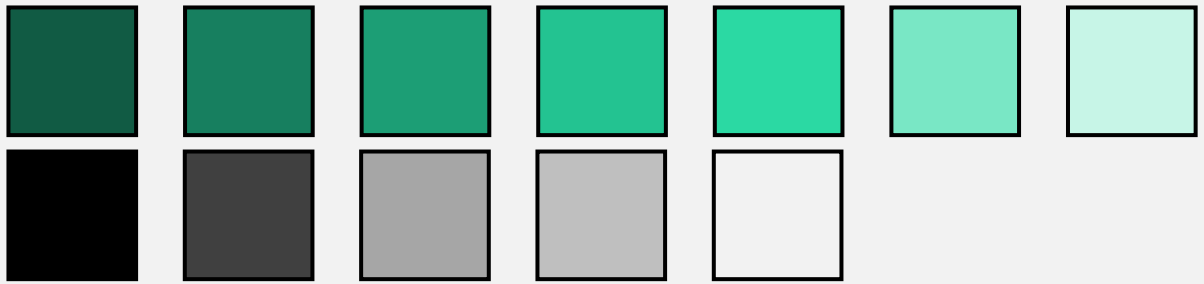

The information in this document is addressed exclusively to the recipient(s). They may contain confidential information, protected by professional secrecy and remain the exclusive property of Sagasia.

This is the key message (Do not move nor resize this). Font size is 28 and only one line

This box is the space that you can use to put whatever content you need to put. Keep in mind of the following rules:

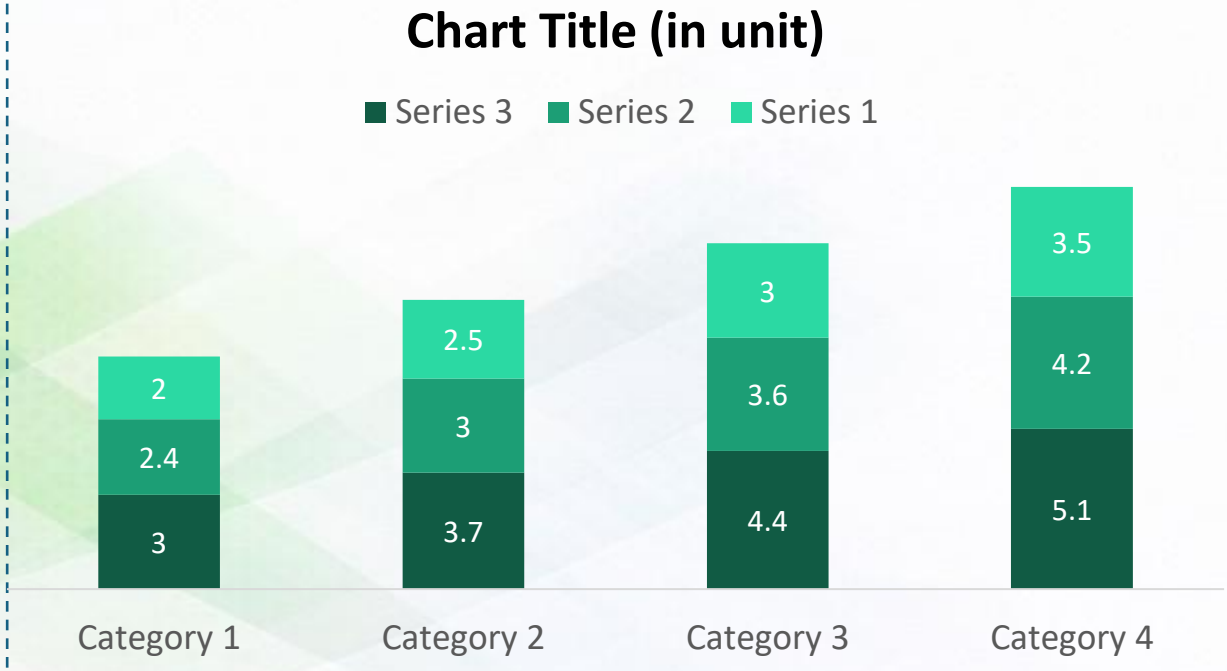

1. Type everything in Calibri
2. Do not exceed this area at all, unless consulted & approved by levels of Associate and above. You may copy & paste this box to the slide you are assigned to for reference.
3. Be very mindful of layout of objects. You have the option to arrange the objects by clicking Alt > H > G > A
4. Check your spelling and grammar. Remove any unnecessary double spaces
5. Range of tolerable font size in this area is 8 – 26. Not smaller, not bigger than that.
6. Be consistent in typing our currencies, punctuation marks, and units. For example: Choose either USD or US$, and it will be applied to the whole document.
7. Always assume your document goes to high-level executives, so it needs to look professional. Ask yourself how would you feel if you are the client reading this document and/or slide?

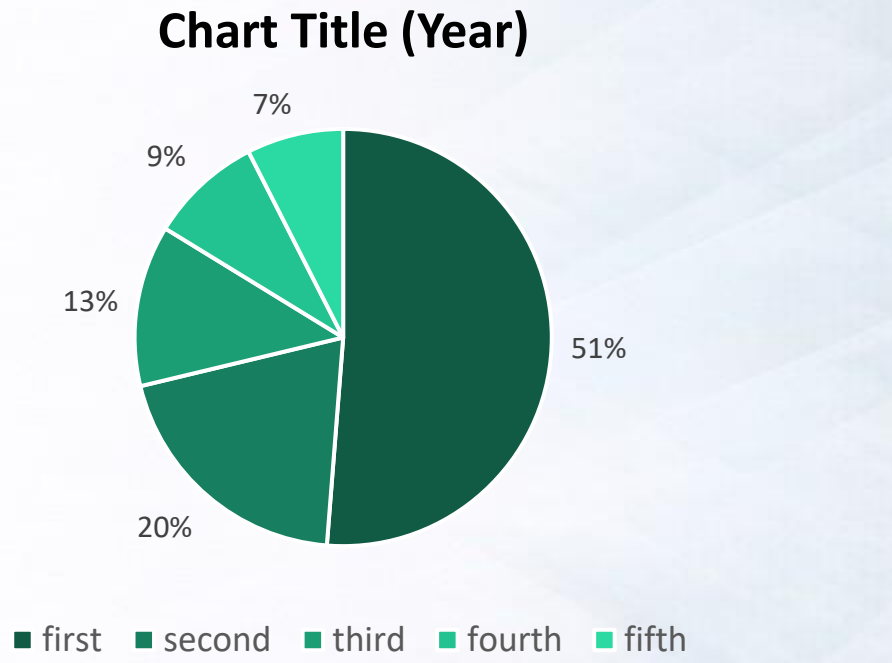

Color Palette

This is where the sources belong. When writing the sources, mention ONLY the institution (you may use popular abbreviations too). E.g. Sources: MEMR Indonesia, WHO, Commonwealth of Nations

The following are examples (not limited) of charts & the style that you should follow

1. The order of the categories from bottom to top should follow biggest to smallest order
    1. The coloring should be from the darkest to the palest.
    2. If you need to change the order of data for display, click the graph & click Alt + J + C + E
    3. Data values need to always be in the middle of the box. Unless if it's too small, feel free to drag it out and color the box according to the color of the data series

This is where the sources belong. When writing the sources, mention ONLY the institution (you may use popular abbreviations too). E.g. Sources: MEMR Indonesia, WHO, Commonwealth of Nations

Key Message can be either Title or framed as a key takeaway but don't exceed the space

WHAT IT IS

Explain and define the actual regulation, the criteria, the specifics in word for word from the rule book and can include screenshot of the government rulebook (highlighting the words that matters most)

60% information / text, 40% visual

WHAT ARE THE IMPLICATIONS

What are the following negative consequences of this regulation?

50% information / text, 50% visual

CASE STUDY

To see an example of real Chinese company having been impacted by the consequences

You describe the implications in the other box but here you show example / evidence of the actual implication having taken place to a Chinese company

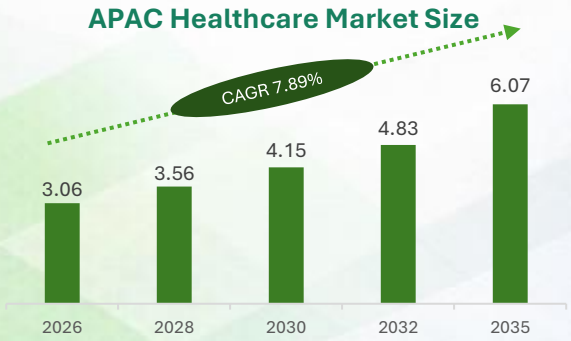

- Which Chinese company has already been affected?
- What exactly happened to that company?
- Which part of the rule caused the impact?
- What was the concrete consequence: lost customer, blocked project, higher cost, lost subsidy, import detention, procurement restriction, etc.?
- What does this example imply for all other Chinese battery companies?

70% information / text, 30% visual

This is where the sources belong. When writing the sources, mention ONLY the institution (you may use popular abbreviations too). E.g. Sources: MEMR Indonesia, WHO, Commonwealth of Nations

APAC/SEA healthcare is set for sustained growth, driven by ageing populations, rising demand and rapid innovation

Overall market situation in 2026 and outlook to 2027 APAC/SEA

Healthcare Services dominate the APAC Healthcare Market with **45% share in 2025**

- APAC remains the **fastest-growing healthcare market globally**, driven by **aging populations**, rising middle-class income, and greater access to care.
- **SEA is a key growth engine**, with expanding healthcare infrastructure, increasing cross-border patient flows, and continued investment in **medical technology and life sciences**.
- Outlook 2027: **steady growth, supported by digital health**, advanced therapies, and **public–private investment**, despite cost pressures and workforce constraints.

Key Takeaway

Healthcare & life-sciences in APAC/SEA are on a solid growth trajectory through 2026–2027, underpinned by demographic, economic and technological tailwinds

Top 3 current outstanding key trends (APAC/SEA)

1 Medical tourism & regional healthcare hubs

- SEA (e.g., Thailand, Singapore, Malaysia) is **strengthening its position as a regional hub** for advanced and affordable care.
- Demand from **regional and long-haul patients is rising**, particularly for oncology, fertility, orthopedics and wellness.

15.53%
Estimated CAGR for medical tourism market

2 Longevity Economy & Healthy Aging

- **Rapidly aging populations** are driving demand for preventive care, chronic disease management and **age-tech solutions**.
- **Growth in wellness**, functional medicine and senior living is **creating new investment opportunities**.

1 in 4
people in APAC will be aged 60+ in 2050

2 Biotech, Advanced Therapies & Digital Health

- Increasing investment in biologics**, cell & gene therapies, and precision medicine**.
- **Wider adoption of AI**, telemedicine and digital health platforms to improve access and outcomes.

18.2%
APAC biotechnology estimated CAGR **for 2024–2030**

APAC pharma is shifting toward innovation-led growth, supported by rising demand, R&D investment and advanced therapies

Current situation, past 2 years, and outlook

Current situation, past 2 years outlook

The APAC pharmaceutical market remains on a steady growth trajectory, supported by ageing populations, rising chronic disease burden and expanding healthcare access. **Growth has been slightly faster than the previous five years** and is increasingly driven by innovative drugs, biologics and advanced therapies

APAC pharmaceutical market
(USD Billions)

7.02% CAGR
APAC Pharmaceutical Market
Projected annual growth **2025–2035**

Vs past 2 years	Current Situation (2024–2026)	Outlook (2027+)
• **Market growth** remained resilient despite global uncertainty • **Ageing populations** continued to drive healthcare demand • Market shifted toward **specialty and innovative medicines**	• **Market growth** remained resilient despite global uncertainty • **Ageing populations** continued to drive healthcare demand • Market shifted toward **specialty and innovative medicines**	• Pharmaceutical demand is **expected to maintain steady growth** • **Innovative medicines** will contribute more to future market growth • **Regulation, pricing and geopolitics** will shape investment decisions

The 4 key pillars for market expansion

Market access & demand
- Market size & patient demand
- Reimbursement & pricing
- Affordability & healthcare access

Regulatory & Compliance
- Drug approvals and clinical requirements
- GMP and quality standards
- IP protection
- Regulatory timelines across markets

Investment & Localization
- Local manufacturing and R&D
- Government incentives
- Tax and investment support
- Local talent and innovation ecosystems

Supply Chain & Partnerships
- API sourcing and manufacturing resilience
- Distributors and market partners
- CRO/CDMO ecosystem
- Strategic alliances and licensing

Key players by country/location

China
- Innovation & scale
- Growing R&D and faster approvals
- Strong government support

Japan
- Mature market
- Strength in basic science
- Global commercialization leader

India
- Manufacturing & cost competitiveness
- Global hub for generics
- Expanding innovation capabilities

South Korea
- Advanced manufacturing
- Strong CRO/CDMO ecosystem
- Expanding drug development capabilities

APAC medical devices are expanding as healthcare investment grows and distribution becomes more strategic and resilient

Current situation, past 2 years, and outlook

Current situation, past 2 years outlook

The **APAC medical devices market** continues to expand, supported by ageing populations, healthcare infrastructure investment and rising demand for advanced medical technologies. **Distribution models are evolving**, with greater focus on supply-chain resilience, local partnerships and market access

8.0% CAGR
APAC Medical devices market
Projected annual growth **2025–2032**

Vs past 2 years	Current Situation (2024–2026)	Outlook (2027+)
• **Strong recovery** in device demand • Rising hospital and diagnostic investment • **Growing adoption** of digital and minimally invasive devices	• Expanding **healthcare infrastructure** • Greater demand for advanced devices • Distribution networks becoming **more strategic**	• **Continued market growth** • Digital and connected devices **gain share** • Localization and supply-chain **resilience increase**

The 4 key pillars for market expansion

Market access & demand
- Hospital and clinic networks
- Tender & procurement
- Product portfolio and pricing
- Local customer relationships

Regulatory & Compliance
- Device registration and licensing
- Quality management systems
- Import requirements
- Post-market surveillance

Logistics & supply chain
- Inventory and demand planning
- Warehousing and transportation
- Supply-chain visibility
- After-sales and technical support

Partnerships & localization
- Manufacturer partnerships
- Strong local distributor networks
- Selective local manufacturing
- Regional market expansion

Key players by country/location

Singapore
- Advanced regulatory ecosystem
- Regional MedTech hub
- Strong international connectivity

Japan
- Advanced medical technology
- High quality standards
- Strong regulatory capabilities

China
- Strong manufacturing ecosystem
- Increasing domestic innovation
- Expanding market access

Malaysia
- Growing device markets
- Improving regulatory cooperation
- Expanding healthcare investment
- Strategic gateway to SEA

APAC wellness is shifting from reactive care toward prevention, healthy ageing and personalized wellbeing

Current situation, past 2 years, and outlook

Current situation, past 2 years outlook

The **wellness market** is shifting from reactive healthcare toward **prevention, healthy ageing and personalized wellbeing**, driven by ageing populations and growing consumer focus on healthspan, nutrition and lifestyle. Wellness is increasingly becoming part of everyday health management rather than an occasional service.

APAC pharmaceutical market
(USD Billions)

8.74% CAGR
APAC wellness Market
Projected annual growth
2025–2031

Vs past 2 years	Current Situation (2024–2026)	Outlook (2027+)
• Strong **post-pandemic wellness demand** • Greater focus on **preventive health** • **Rising interest** in mental wellness & healthy ageing	• **Prevention & longevity** gaining importance • **Personalized wellness** becoming mainstream • **Wellness tourism** strongly recovering in Asia	• Continued shift toward **healthy longevity** • Technology will **enable greater personalization** • Integrated **medical-wellness models** will expand

The 4 key pillars for market expansion

Longevity & Preventive Health
- Healthy ageing & prevention
- Chronic disease prevention
- Nutrition & physical wellness
- Longer healthspan

Personalization & Technology
- Personalized health solutions
- Wearables & health monitoring
- AI & health data
- Digital wellness platforms

Wellness Experience & Tourism
- Wellness tourism
- Medical-wellness programs
- Premium wellness experiences
- Holistic & traditional therapies

Investment & Partnerships
- Wellness infrastructure
- Healthcare partnerships
- New wellness concepts
- Cross-border expansion

Key players by country/location

China
- APAC's largest wellness market
- Strong traditional medicine ecosystem

Japan
- Healthy ageing & longevity leader
- Strong preventive-health culture
- Advanced wellness technology

Singapore
- Premium urban wellness hub
- Strong health & technology ecosystem
- Growing wellness market

South Korea
- Leading wellness-tourism destination
- Strong medical-wellness ecosystem
- Spa & holistic wellness expertise
- Growing longevity offerings
